RECOMMENDED CITATION

stats writer (2024). ? How can I accomplish it in Google Sheets?. PSYCHOLOGICAL SCALES. Retrieved from <https://scales.arabpsychology.com/?p=163582>

The process of completing a task or achieving a goal using the application Google Sheets, which is a web-based spreadsheet program developed by Google. This tool allows users to organize, analyze, and manipulate data in a collaborative online environment. It offers various features such as formulas, charts, and filters to help users efficiently manage and analyze their data. With Google Sheets, users can easily collaborate with others, access their work from any device, and track changes in real-time. It is a versatile and user-friendly tool that can be utilized for a wide range of purposes, making it a popular choice for individuals and businesses alike.

LEN

Returns the length of a string.

Sample Usage

```
LEN(A2)
```

```
LEN("lorem ipsum")
```

Syntax

```
LEN(text)
```

`text` - The string whose length will be returned.

Notes

`LEN` counts all characters, even spaces and nonprinting characters. In cases where `LEN` returns unexpected values, ensure that there are no such characters in `text`.

See Also

`LEFT`: Returns a substring from the beginning of a specified string.

`RIGHT`: Returns a substring from the end of a specified string.

`MID`: Returns a segment of a string.
