To count the number of rows with text in Excel, follow these steps:

1. Select the entire range of cells in the column where you want to count the rows.
2. Go to the Home" tab and click on the "Find & Select" button.
3. From the drop-down menu, select "Go To Special".
4. In the pop-up window, select "Constants" and then check the box next to "Text" under the "Data" section.
5. Click "OK" and all the cells containing text will be selected.
6. Look at the bottom right corner of the Excel window, where you will see the total number of selected cells. This will be the number of rows with text in the selected column.

This method can also be used to count the number of rows with specific types of text, such as numbers, dates, or formulas. It is a quick and efficient way to get an accurate count of rows with text in Excel.

Count Rows with Text in Excel (3 Examples)

You can use the following methods to count rows with particular text in Excel:

Method 1: Count Rows with Any Text

=COUNTIF(A2:A11, "<>")

Method 2: Count Rows with No Text

=COUNTBLANK(A2:A11)

Method 3: Count Rows with Specific Text

=COUNTIF(A2:A11, "Mavs")

The following examples show how to use each method with the following dataset in Excel:

	A	B	C	D	E	F
1	Team	Points				
2	Mavs	22				
3	Mavs	23				
4	Heat	40				
5		16				
6	Rockets	17				
7	Nets	17				
8		28				
9	Mavs	25				
10	Warriors	30				
11	Lakers	12				
12						
13						
14						
15						
16						
17						
18						

Example 1: Count Rows with Any Text

We can use the following formula to count the number of rows with *any* text in column A:

=COUNTIF(A2:A11, "<>")

The following screenshot shows how to use this formula in practice:

	A	B	C	D	E	F
1	Team	Points		Rows with Text		
2	Mavs	22		8		
3	Mavs	23				
4	Heat	40				
5		16				
6	Rockets	17				
7	Nets	17				
8		28				
9	Mavs	25				
10	Warriors	30				
11	Lakers	12				
12						
13						
14						
15						

We can see that there are 8 rows with any text in the Team column.

Example 2: Count Rows with No Text

We can use the following formula to count the number of rows with no text in column A:

=COUNTBLANK(B2:B11)

The following screenshot shows how to use this formula in practice:

	A	B	C	D	E
1	Team	Points		Rows with No Text	
2	Mavs	22		2	
3	Mavs	23			
4	Heat	40			
5		16			
6	Rockets	17			
7	Nets	17			
8		28			
9	Mavs	25			
10	Warriors	30			
11	Lakers	12			
12					
13					
14					
15					
16					
17					

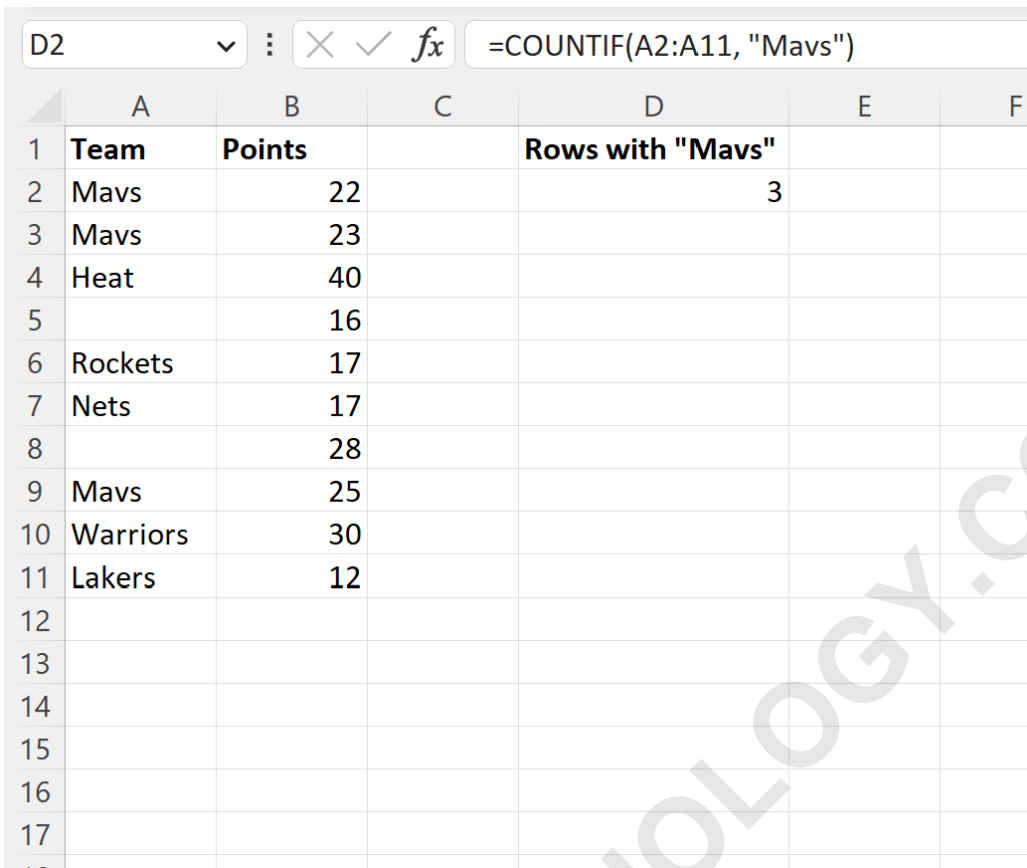

We can see that there are 2 rows with no text in the Team column.

Example 3: Count Rows with Specific Text

We can use the following formula to count the number of rows with a value of "Mavs" in column A:

=COUNTIF(A2:A11, "Mavs")

The following screenshot shows how to use this formula in practice:

The screenshot shows an Excel spreadsheet with the following data:

	A	B	C	D	E	F
1	Team	Points		Rows with "Mavs"		
2	Mavs	22		3		
3	Mavs	23				
4	Heat	40				
5		16				
6	Rockets	17				
7	Nets	17				
8		28				
9	Mavs	25				
10	Warriors	30				
11	Lakers	12				
12						
13						
14						
15						
16						
17						

The formula bar at the top shows the formula: `=COUNTIF(A2:A11, "Mavs")`

We can see that there are 3 rows with a value of "Mavs" in the Team column.

The following tutorials explain how to perform other common tasks in Excel:
