PSYCHOLOGICAL SCALES. Retrieved from <https://scales.arabpsychology.com/?p=161303>

Google Sheets offers a built-in function, "`=RANDBETWEEN()`", which allows users to generate random numbers within a specified range. This function can be used for a variety of purposes, such as creating random data for testing or generating lottery numbers. By following the correct syntax and parameters, users can easily generate random numbers in Google Sheets. This feature provides a convenient and efficient way to add randomness to spreadsheets and enhance data analysis.

RAND

Returns a random number between 0 inclusive and 1 exclusive.

Sample Usage

`RAND()`

Syntax

`RAND()`

See Also

`RANDBETWEEN`: Returns a uniformly random integer between two values, inclusive.
