To remove non-numeric characters from a cell in Google Sheets, you can use the "REGEXREPLACE" function. This function allows you to specify a regular expression pattern and replace any non-numeric characters with a blank space. This can be useful for cleaning up data and ensuring that only numeric values are present in a cell. You can also use the "CLEAN" function to remove any non-printable characters from a cell. By combining these functions, you can easily remove non-numeric characters from a cell in Google Sheets.

Google Sheets: Remove Non-Numeric Characters from Cell

You can use the following formula to remove non-numeric characters from cells in Google Sheets:

```
=REGEXREPLACE(A2,"D+", "")
```

This particular formula will remove all non-numeric characters from cell A2.

Example: Remove Non-Numeric Characters from Cell in Google Sheets

Suppose we have the following list of phone numbers in Google Sheets:

| | A | B | C | D |
|----|---------------------|---|---|---|
| 1 | Phone Number | | | |
| 2 | (443) 875-0091 | | | |
| 3 | (219) 335-3849 | | | |
| 4 | (554) 228-9344 | | | |
| 5 | (554) 871-0756 | | | |
| 6 | (219) 299-0733 | | | |
| 7 | (413) 122-0833 | | | |
| 8 | (514) 854-2232 | | | |
| 9 | (623) 199-2008 | | | |
| 10 | (214) 410-2394 | | | |
| 11 | (445) 239-4489 | | | |
| 12 | (319) 776-0043 | | | |
| 13 | | | | |
| 14 | | | | |
| 15 | | | | |
| 16 | | | | |
| 17 | | | | |
| 18 | | | | |
| 19 | | | | |

Now suppose that we would like to remove all non-numeric characters from each phone number so that we're only left with the numbers.

We can use the following formula to do so:

=REGEXREPLACE(A2,"D+", "")

We'll type this formula in cell B2, then drag and fill it down to each remaining cell in column B:

| | A | B | C |
|----|---------------------|---|---|
| B2 | | <code>=REGEXREPLACE(A2, "\D+", "")</code> | |
| 1 | Phone Number | Non-Numeric Characters Removed | |
| 2 | (443) 875-0091 | 4438750091 | |
| 3 | (219) 335-3849 | 2193353849 | |
| 4 | (554) 228-9344 | 5542289344 | |
| 5 | (554) 871-0756 | 5548710756 | |
| 6 | (219) 299-0733 | 2192990733 | |
| 7 | (413) 122-0833 | 4131220833 | |
| 8 | (514) 854-2232 | 5148542232 | |
| 9 | (623) 199-2008 | 6231992008 | |
| 10 | (214) 410-2394 | 2144102394 | |
| 11 | (445) 239-4489 | 4452394489 | |
| 12 | (319) 776-0043 | 3197760043 | |
| 13 | | | |
| 14 | | | |
| 15 | | | |
| 16 | | | |
| 17 | | | |
| 18 | | | |
| 19 | | | |
| 20 | | | |

Notice that each non-numeric character has been removed from each phone number.

In particular, the parentheses and the dashes have been removed from each phone number.

Note: You can find the complete documentation for the REGEXREPLACE function .
