## RECOMMENDED CITATION

stats writer (2024). *How can I use the UPLUS function in Google Sheets?*.

PSYCHOLOGICAL SCALES. Retrieved from <https://scales.arabpsychology.com/?p=161862>

The UPLUS function in Google Sheets allows users to quickly and easily add up multiple numbers in a cell range. This function is useful for streamlining calculations and saving time when working with large data sets. To use the UPLUS function, simply input the cell range containing the numbers you want to add and the function will automatically calculate the sum. This feature is particularly helpful for financial and statistical analysis, as well as any other tasks that involve adding up multiple values. With the UPLUS function, users can efficiently perform complex calculations without the need for manual input, making it a valuable tool for data management and analysis in Google Sheets.

## UPLUS

Returns a specified number, unchanged.

### Sample Usage

`UPLUS(-4)`

`UPLUS(A2)`

### Syntax

`UPLUS(value)`

`value` - The number to return.

### See Also

`UNARY_PERCENT`: Returns a value interpreted as a percentage; that is, `UNARY_PERCENT(100)` equals `1`.

`UMINUS`: Returns a number with the sign reversed.

### Examples
