RECOMMENDED CITATION

stats writer (2024). *How do I make the text smaller in Google Sheets?*. PSYCHOLOGICAL SCALES. Retrieved from <https://scales.arabpsychology.com/?p=163077>

If you wish to reduce the font size of your text in Google Sheets, you can do so by selecting the desired cells or text and using the font size dropdown menu located in the toolbar. Alternatively, you can use the keyboard shortcut "Ctrl + Shift + ," to decrease the font size. This feature allows for customization and flexibility in formatting your spreadsheet to your desired specifications.

SMALL

Returns the *n*th smallest element from a data set, where *n* is user-defined.

Sample Usage

```
SMALL(A2:B100, 4)
```

```
SMALL(A2:B100, C2)
```

Syntax

```
SMALL(data, n)
```

data - The array or range containing the dataset to consider.

n - The rank from smallest to largest of the element to return.

E.g. setting *n* to 4 will cause `SMALL` to return the 4th smallest element from *data*.

See Also

`RANK`: Returns the rank of a specified value in a dataset.

`QUARTILE`: Returns a value nearest to a specified quartile of a dataset.

`PERCENTRANK`: Returns the percentage rank (percentile) of a specified value in a dataset.

`PERCENTILE`: Returns the value at a given percentile of a dataset.

`MINA`: Returns the minimum numeric value in a dataset.

`MIN`: Returns the minimum value in a numeric dataset.

`MEDIAN`: Returns the median value in a numeric dataset.

`MAXA`: Returns the maximum numeric value in a dataset.

`MAX`: Returns the maximum value in a numeric dataset.

LARGE: Returns the nth largest element from a data set, where n is user-defined.

AVERAGEA: Returns the numerical average value in a dataset.

AVERAGE: The AVERAGE function returns the numerical average value in a dataset, ignoring text.
