## RECOMMENDED CITATION

stats writer (2024). *How do I round numbers to the nearest 25 in Google Sheets?*. PSYCHOLOGICAL SCALES. Retrieved from <https://scales.arabpsychology.com/?p=160349>

To round numbers to the nearest 25 in Google Sheets, use the ROUND function with the second argument set to -2. This will round the number to the nearest multiple of 25. For example, if the number is 83, it will be rounded to 75, and if the number is 112, it will be rounded to 100. This function is useful for financial calculations or when working with large numbers. Simply enter the number you want to round and the specific formula into a cell in your Google Sheets spreadsheet to easily round to the nearest 25.

## Round to Nearest 25 in Google Sheets

You can use the following formulas to round values to the nearest 25 in Google Sheets:

### Formula 1: Round to Nearest 25

**=MROUND(A1, 25)**

### Formula 2: Round Up to Nearest 25

**=CEILING(A1, 25)**

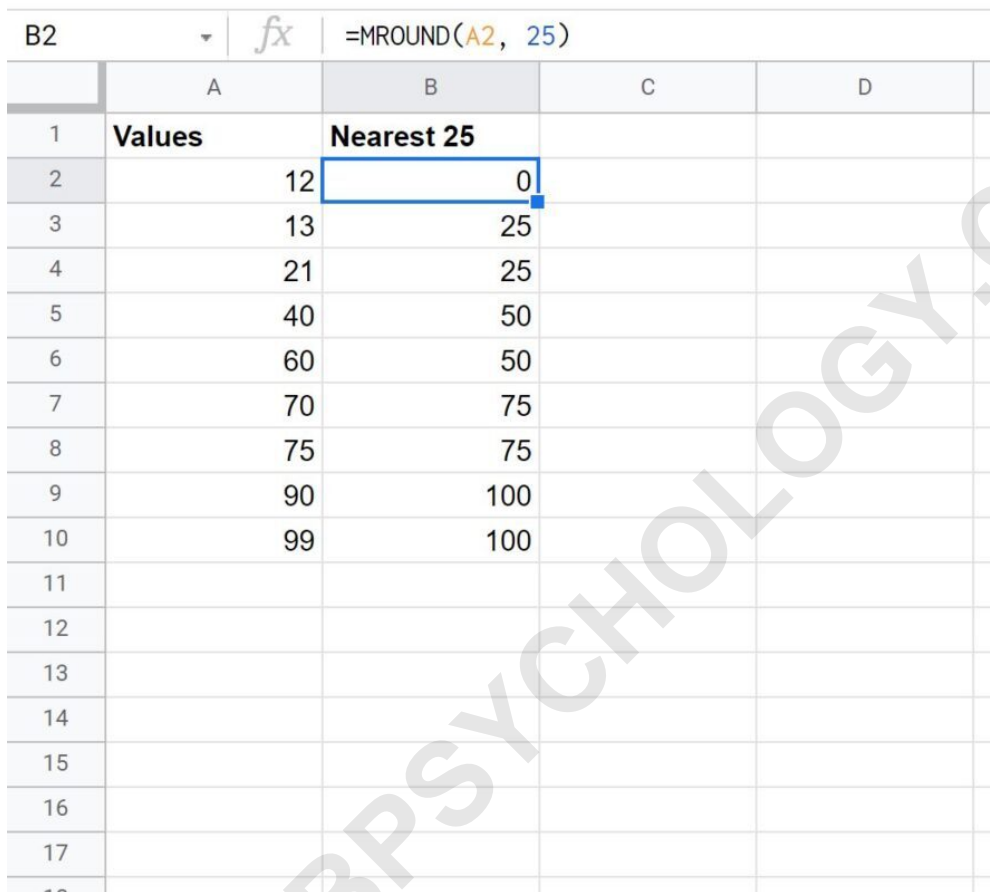

### Formula 3: Round Down to Nearest 25

**=FLOOR(A1, 25)**

The following examples show how to use each formula in practice.

#### Example 1: Round to Nearest 25

The following screenshot shows how to use the function to round each value in column A to the nearest 25:

The screenshot shows a Google Sheets spreadsheet with the following data:

	A	B	C	D
1	Values	Nearest 25		
2	12	0		
3	13	25		
4	21	25		
5	40	50		
6	60	50		
7	70	75		
8	75	75		
9	90	100		
10	99	100		
11				
12				
13				
14				
15				
16				
17				

The formula bar at the top shows the formula: `=MROUND(A2, 25)`. The cell B2 is highlighted with a blue border, indicating it is the active cell.

The values in column B represent the values in column A rounded to the nearest 25.

#### Example 2: Round Up to Nearest 25

The following screenshot shows how to use the function to round each value in column A up to the nearest 25:

	A	B	C	D
B2		<code>=CEILING(A2, 25)</code>		
1	<b>Values</b>	<b>Up to Nearest 25</b>		
2	12	25		
3	13	25		
4	21	25		
5	40	50		
6	60	75		
7	70	75		
8	75	75		
9	90	100		
10	99	100		
11				
12				
13				
14				
15				
16				
17				

The values in column B represent the values in column A rounded up to the nearest 25.

**Example 3: Round Down to Nearest 25**

B2 fx =FLOOR(A2, 25)

	A	B	C	D
1	<b>Values</b>	<b>Down to Nearest 25</b>		
2	12	0		
3	13	0		
4	21	0		
5	40	25		
6	60	50		
7	70	50		
8	75	75		
9	90	75		
10	99	75		
11				
12				
13				
14				
15				
16				
17				

**The values in column B represent the values in column A rounded down to the nearest 25.**
