The SIGN function in Google Sheets is a mathematical function that can be used to determine the sign of a number. This function will return 1 if the number is positive, -1 if the number is negative, and 0 if the number is zero. To use the SIGN function, simply enter the function name in a cell, followed by the number or cell reference in parentheses. This will provide a quick and easy way to determine the sign of a number within your Google Sheets spreadsheet.

SIGN

Given an input number, returns `-1` if it is negative, `1` if positive, and `0` if it is zero.

Sample Usage

`SIGN(-42)`

`SIGN(A2)`

Syntax

`SIGN(value)`

`value` - The value whose sign will be evaluated.
