Formatting fonts in Google Sheets allows you to customize the appearance of your text by changing its font, size, color, and style. To format fonts, simply select the desired text and use the formatting options in the toolbar or the Format Cells menu. This can help make your data more visually appealing and organized, making it easier to read and understand. Additionally, you can also use conditional formatting to automatically change the font based on certain criteria, making your data more dynamic and interactive. Overall, formatting fonts in Google Sheets is a simple and effective way to enhance the overall presentation of your data.

Google Sheets Format Fonts

Format Fonts

You can format fonts in four different ways: color, font name, size and other characteristics.

Fonts

The default font in Google Sheets is **Arial**.

The font can be changed for both numbers and text.

Why change the font in Google Sheets?

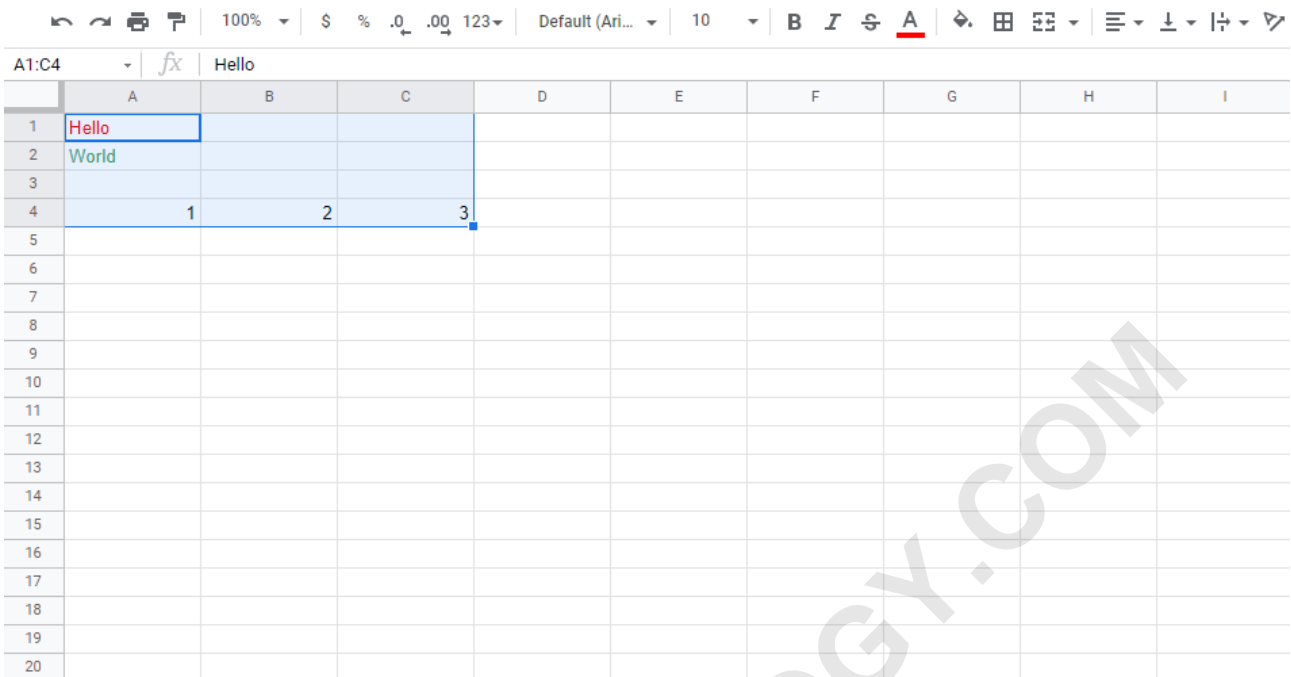

Make the data easier to read
Make the presentation more appealing

How to change the font:

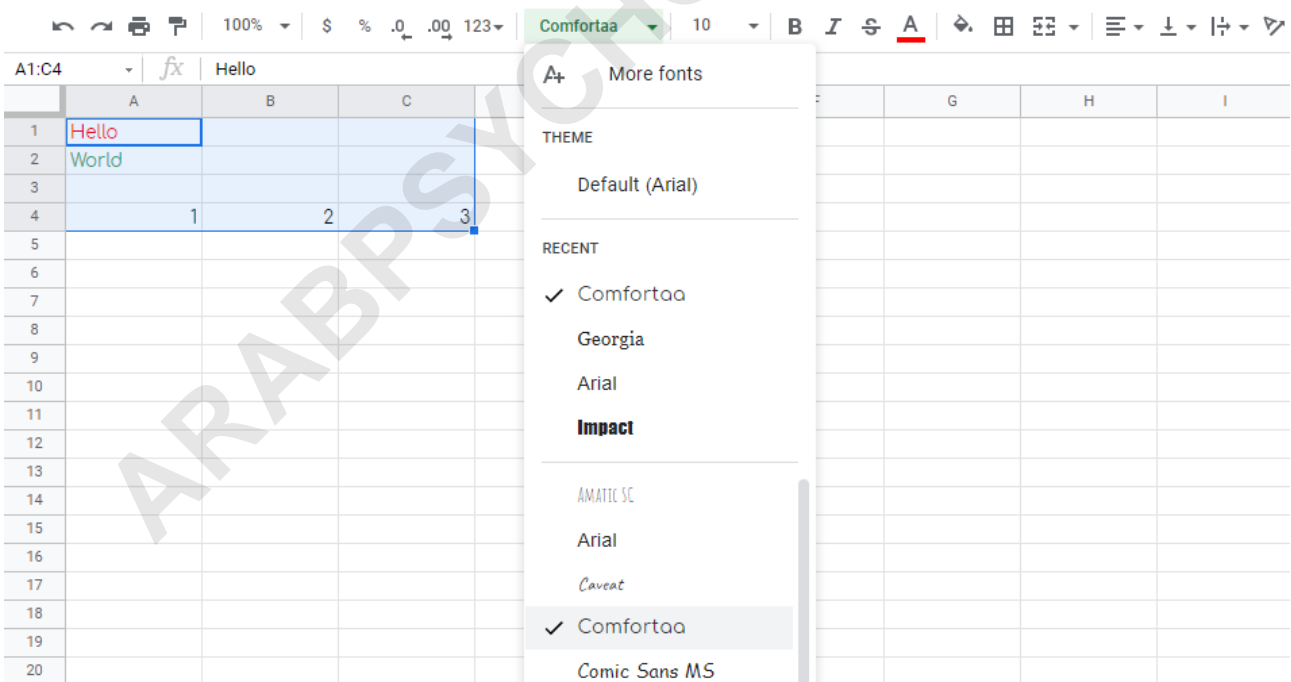

Select a cell or a range
Click the font drop down menu
Select a font

Let's have a look at an example.

Select range **A1:C4**

Click the font drop down menu

Select **Comfortaa**
