Whether you are new to the platform or looking to expand your knowledge, let's embark on this learning journey and discover the endless possibilities of Google Sheets."

FACT

The FACT function returns the factorial of a number.

Sample Usage

FACT(3)

FACT(A2)

Syntax

FACT(value)

value - The number or reference to a number whose factorial will be calculated and returned.

Notes

If a number or reference to a number with a decimal part is provided to FACT, the decimal part will be silently truncated before calculation.

See Also

MULTINOMIAL: Returns the factorial of the sum of values divided by the product of the values' factorials.

FACTDOUBLE: Returns the "double factorial" of a number.

COMBIN: The COMBIN function returns the number of ways to choose some number of objects from a pool of a given size of objects.
