Excel is a powerful tool used for data analysis, organization, and visualization. To fully utilize its features, it is important to practice using Excel regularly. Some exercises that can help improve one's proficiency in using Excel include creating basic spreadsheets with different formulas and functions, sorting and filtering data, creating charts and graphs, using pivot tables, and performing data analysis tasks. Additionally, practicing keyboard shortcuts and familiarizing oneself with the various tools and features available in Excel can also enhance proficiency. Regularly practicing these exercises will not only help in mastering Excel, but also increase efficiency and productivity in data management tasks.

Excel Exercises

You can test your Excel skills with W3Schools' Exercises.

Exercises

We have gathered a variety of Excel exercises (with answers) for each Excel Chapter.

Try to solve an exercise by editing some code, or show the answer to see what you've done wrong.

Count Your Score

You will get 1 point for each correct answer. Your score and total score will always be displayed.
