RECOMMENDED CITATION

mohammad looti (2025). *EXTRAPYRAMIDAL EFFECTS*. PSYCHOLOGICAL SCALES.
Retrieved from <https://scales.arabpsychology.com/?p=44166>

is an umbrella term used to describe any reactions which involve the extra-pyramidal tract which is associated with the central nervous system. These effects are effectively responsible for movements in various conditions. Extra-pyramidal effects include: drug-induced parkinsonism, dystonia and even akathisia.

EXTRAPYRAMIDAL EFFECTS: "There is a wide range of reactions which occur in the extra pyramidal tract, these reactions are categorised under the term extrapyramidal effects. "
