RECOMMENDED CITATION

mohammad looti (2025). *FALSE-CONSENSUS EFFECT*. PSYCHOLOGICAL SCALES.
Retrieved from <https://scales.arabpsychology.com/?p=47950>

is a popular social phenomena where an individual believes that own beliefs, ideals, concepts, opinions, values and attitudes are held more widely within a certain population than they actually are.

FALSE-CONSENSUS EFFECT: "Some individuals with an inflated ego would 'suffer' from the false-consensus effect, where they believed their opinions were more popular than they actually are. "
