RECOMMENDED CITATION

mohammad looti (2025). *MIDLIFE CRISIS*. PSYCHOLOGICAL SCALES. Retrieved from <https://scales.arabpsychology.com/?p=47957>

typically occurs between the ages of 45 to 60 and is gender non-specific. There is no one biological reason for a midlife crisis, however, major life events such as health or occupational issues may have an inductive effect.

MIDLIFE CRISIS: "A midlife crisis can develop in both males and females, typically triggered by a negative life changing event such as divorce. "
