## RECOMMENDED CITATION

mohammad looti (2025). *MODIFIED RHYME TEST (MRT)*. PSYCHOLOGICAL SCALES.  
Retrieved from <https://scales.arabpsychology.com/?p=60403>

was first developed by Arthur S. House, Carl E. Williams, Michael Flecker and the psychoacoustician Karl D. Kryter (1914 -), the test aims to evaluate the participants auditory processing skills. They are played a single-syllable word and they must identify it from a list of words printed.

MODIFIED RHYME TEST (MRT): "The modified rhyme test aims at testing participants' auditory processing skills which involves identifying a word from a recording which is played to them."

DECENTRALIZED ORGANIZATION PLEASURE PRINCIPLE
