RECOMMENDED CITATION

mohammad looti (2025). *Neural Networks*. PSYCHOLOGICAL SCALES. Retrieved from <https://scales.arabpsychology.com/?p=32939>

A neural network is an artificial network or mathematical model for information processing based on how neurons and synapses work in the human brain. Using the human brain as a model, a neural network connects simple nodes (or "neurons", or "units") to form a network of nodes - thus the term "neural network".
