mohammad looti (2025). *Perception Illusion*. PSYCHOLOGICAL SCALES. Retrieved from <https://scales.arabpsychology.com/?p=33751>

A perception illusion, a form of optical illusion, is a display that attempts to fool the senses. An example is the rotating barber pole signs that adorn barber shops. The pole has three colors that wrap around the sign. When rotated the sign gives the illusion of the stripes moving up or down the pole.
