RECOMMENDED CITATION

mohammad looti (2025). *VISUAL SEARCH*. PSYCHOLOGICAL SCALES. Retrieved from <https://scales.arabpsychology.com/?p=53074>

the procedure of identifying a target visual stimulant among distractor stimulants. The traits of the target and distractors are altered in experimental analyses to investigate the cognitive functions which cause visual attention.

VISUAL SEARCH: "A common example of visual search is attempting to find one's keys in a messy room or an acquaintance in a crowded mall. "
